6<sup>th</sup> February 2009

Shortly after 8:30am this morning, a Piper Chieftain belonging to CSG Services experienced difficulty on the way to Maningrida and performed an emergency landing in the shallows off Darwin. All 6 people on board at the time are safe, and were released by emergency services from the scene without being taken to hospital. At this point the cause of the incident remains unknown, however we would like to congratulate the pilot following all emergency landing and evacuation procedures and his very professional handling of the situation.

No further information is available at this time.
