

Subject: AF News Flash Issue 8  
Date: Fri, 14 Jan 2000 07:47:22 +1000

Hello and Welcome to another Issue of the AirCentre News Flash from the Archerfield News Desk where aviation history is recorded for all those persons who fly-in, pilot or enjoy the ownership of light aircraft.

The Mobil fuel contamination saga is almost over.

All aviators in OZ are no doubt aware of the Mobil avgas crisis that resulted in the grounding of most light aircraft around the country for the past week.

After much news media drama and the issuing and reissuing of AD's by CASA the contamination problem at Mobil appears to have finally been resolved.

CASA, meanwhile, are still talking about getting in expert advice, from overseas if necessary, to test the fuel some 6 weeks after the problem surfaced!

Don't hold your breath waiting for the "all clear" from CASA!

Maybe Mobil should bring in the experts from overseas to check out CASA!

You can follow the history and most of the "contamination" story on the AirCentre News page Week Three issued with this News Flash.

It's up - up - and - away once again!

Well, almost.

Don
